

Aug. 2, 1928.

Mr. Orson Nelson,
Upalco, Utah.

Dear Sir:

RE: SAND WASH.

I am hereby giving you formal notice to put in a headgate at your point of diversion from Sand Wash. The law requires every user to install adequate headgate and measuring devices and it is impossible for the commissioner to properly distribute the water unless this is done. The law also provides that where a notice of this kind is not complied with within thirty days the State Engineer may put in the device and collect the cost from the user by Court proceedings.

Yours very truly,

State Engineer.
